

## **What can we learn from this experience?**

April 22, 2020

Regarding the pandemic our country is going through, we had to quarantine ourselves in our homes so we can stop the effects of this disease. And as per the ministry of higher education to continue our lessons online.

My experience was hard a little bit because of the country's issues like poor internet services, electricity is permanently cut off, etc.

But every day we appreciate our teacher's efforts to make the online sessions more accessible for us.

Despite these circumstances, we have not stopped communicating with each other and we will not give up. We will fight this crisis because we are stronger together.

Thank you for everyone who helped to overcome this crisis.

Reina Safwan Sabalbal, student in 2<sup>nd</sup> year EPP - Tripoli.
