

## What can we learn from this experience?

April 29, 2020

Hey People!

Don't be selfish humans!

It wasn't an accident that the earth day came this year in a period where we are all stuck at home during quarantine just to battle the COVID-19 together.

Yes, it wasn't a surprise. Earth needs to take a pause from pollutions, from problems made by each one of us.

We cut trees, we pollute the air from industries, we throw plastic, glass, papers, all our trash in the sea, on the beach and we do many other unknowledge acts each day...

Nature smile, Earth smile and there are always in silence.

Think by humanity!

It is the time to let the plants, water, air, all the elements of nature to be free from us!

Don't be selfish humans!

It is their earth also!

Nature have also spirit!

So, let it rest! Let it breath!
